

# how to play boules

*RealGames*

## **Objective**

The first player to reach a total of 13 points over multiple rounds wins.

## **Number of players**

Two to four.

## **Setting up**

Each player/team selects the balls of the same pattern to play with. Mark your throwing line and toss a coin to decide who throws the small wooden target ball ("Cachonet"). Player/team 1 then throws a single ball towards the Cachonet. The next player/team then throws its balls one at a time until either they have the closest ball or both balls have been thrown. The next player/team then has its turn in the same fashion. After all balls have been thrown, the player/team with the ball closest to the Cachonet scores 1 point. An extra point is scored if the next closest ball is also theirs. Rounds continue to be played until a team has accumulated 13 points.
