

GIANT HOOKEY CUSTOM BOARD TEMPLATE

If you have limited graphic design capabilities all that we require is for you to “fill” the red circle with your “background” design. For the numbers, you are welcome to either edit them to your own desired font, size and colour or alternatively we can do that for you in preparing your design mock up for approval. It is important that the numbers stay in the approximate positions shown to align with the hook positions as shown by the small red dots.
